COMMAND NEXUS · CIT 140 · WEEK 1

# Problem Brief

Meridian Forge Robotics · The Process Below

| LEARNER | ARTIFACT | STATUS |
| --- | --- | --- |
| Dante Murray | Problem Brief | Working document |

SECTION 01

## Visible Failure

MR-7 kept repeating test K-44 which was not in its test catalog.

SECTION 02

## Verified Facts

Nia says that MR-17 was behaving normally before this.
Mara says that production has paused in the affected QA cell.
Nia says MR-17 accepted TEST_K44_START at 02:13:07

SECTION 03

## Assumptions and Open Questions

Records suggest that Mr-17 was accidentally assigned K-44
Elias says that legacy_sync.exe caused the entire incident

SECTION 04

# System Environment Map

SECTION 04A

## People and Roles

Elias
Mara
Nia

SECTION 04B

## Processes and Rules

Legacy_sync.exe ellegedly caused the event.

SECTION 04C

## Information and Data

Records and Q/A review

SECTION 04D

## Technology and Tools

Legacy_sync.exe, Test protocol K-44. and robot M-17

SECTION 04E

## Environment and Constraints

The robot should resume tests as soon as the issue is resolved

SECTION 05

## Investigation Boundary

### Inside the Investigation

The team will now examine the legacy_sync.exe file as well as other reasons the K-44 training protocol was brought out of retirement.

### Outside for Now

Current evidence does not require complete termination of the project as no danger has been notable.

SECTION 06

## Organizational Impact

Nia, Elias, Mara, and the QA cell has completely paused production.

SECTION 07

## Problem Statement

The M-17 robot has executed training protocol K-44 and was not supposed to as this protocol is "retired", this has caused production to stop on the QA cell.

SECTION 08

## Next Investigation Step

legacy_sync.exe should be investigated in order to be sure that it is the cause and if it isn't the K-44 protocol should be erased so no further incidents can occur.
