CIT 140 · Week 4 · Cedar Junction

Validated Requirements Set

Report · Revision 2890

R-01 · functional

Requirement: The system must distinguish held from ready by knowing that they are different things, held means the visitor has arrived but cannot move forward in this department.

Source: W04-S01 · Dana Ruiz

Rationale: This matters because if the visitor cannot move forward than this could effect the entire operation hence why it is not ready

Acceptance check: Dana needs to confirm intake workflow and understand why the visitor cannot move forward.

Priority: Must · **Validation:** Confirmed by Dana Ruiz

Conflict or decision: Readiness cannot be confirmed while there is a held status, held means a visitor can no longer move forward, this means readiness cannot be confirmed.

R-02 · user

Requirement: The system must have staff that knows what they are meant to do and who can understand when a status exception occurs

Source: W04-S01 · Dana Ruiz

Rationale: This matters because staff needs to see which condition applies, who changed it, and the next approved step.

Acceptance check: The staff can continue to make calls to try and figure out what happened.

Priority: Must · **Validation:** Confirmed by Dana Ruiz

Conflict or decision: Readiness cannot be confirmed while there is a held status, held means a visitor can no longer move forward, this means readiness cannot be confirmed.

R-03 · business

Requirement: only after a room and qualifies clinician are available.

Source: W04-S02 · Dr. Lena Okafor

Rationale: this matters because clinical operations needs the current readiness state before intake promises a start time

Acceptance check: Lena can validate capacity and readines rules

Priority: Must · **Validation:** Confirmed by Dr. Lena Okafor

Conflict or decision: Readiness can only be confirmed if there is a available room and clinician

---

R-04 · functional

Requirement: when readiness changes all effected by it must be notified, and measures must be taken to ensure readiness.

Source: W04-S02 · Dr. Lena Okafor

Rationale: this matters because intake cannot process a start time without it

Acceptance check: Lena can validate readiness rules

Priority: Must · **Validation:** Confirmed by Dr. Lena Okafor

Conflict or decision: Readiness can only be confirmed if there is a available room and clinician

R-05 · user

Requirement: Communication needs have to be met because without communication a system cannot function.

Source: W04-S03 · Priya Shah

Rationale: It matters because without communication a system will not function.

Acceptance check: Priya can validate communication needs.

Priority: Must · **Validation:** Confirmed by Priya Shah

Conflict or decision: Language, communication, and approved support needs must remain available to authorized staff through confirmation, communication is key in a system.

R-06 · constraint

Requirement: The required alternative is that the process needs staff assistance until access can be granted.

Source: W04-S03 · Priya Shah

Rationale: Staff should be able to assist the consumer when required.

Acceptance check: Priya validates access needs

Priority: Must · **Validation:** Confirmed by Priya Shah

Conflict or decision: Language, communication, and approved support needs must remain available to authorized staff through confirmation, communication is key in a system.

R-07 · nonfunctional

Requirement: the minimum status staff need for a task.

Source: W04-S04 · Jordan Kim

Rationale: more detailed information depends on the staff members role and authorized access.

Acceptance check: Jordan validates access

Priority: Must · **Validation:** Confirmed by Jordan Kim

Conflict or decision: All employees will see important history, however, some info will be limited based on the employees role and access.

R-08 · functional

Requirement: history that must remain available is: Who made the change, the previous value, the new value, and the time

Source: W04-S04 · Jordan Kim

Rationale: this matters because everyone involved must understand the scope of the problem regardless of their access and role

Acceptance check: Jordan validates access audit and availability constraints

Priority: Must · **Validation:** Confirmed by Jordan Kim

Conflict or decision: All employees will see important history, however, some info will be limited based on the employees role and access.

Professional Guidance Assessment

IIBA: IIBA is a professional association that is also called International Institute of Business Analysis which: Publishes business-analysis standards, the BABOK Guide, career resources, and certifications.

ISO/IEC/IEEE 29148: Together they publish the week 4 standard.

PMI: PMI focuses on product delivery while week 4 focuses more on availability and readiness

Application: This guidance helped me to improve my ability to put together both what people were saying with the requirements.

Prepared in Command Nexus. Canvas remains the official submission point.
