List 3-5 practical tools, templates, or supports in your system. What does each one help the learner build, decide, or navigate?
I really didn't understand what you meant by tools and templates?

Write 3 identity-building questions that help learners discover what they bring to the work

1. What is a lived experience, challenge, or background of yours that gives you a unique lens on this topic?
2. When you are at your best in a group or project, what specific energy, perspective, or strength do you naturally add to the room?
3. What is a value or lesson from your family, culture, or community that guides the way you approach problem-solving?
